

Broiler business branch

FARRIA

Since the year 2006, the “Agro-Oven” Broiler Business Branch is a European-level highcapacity manufacturing complex which includes an incubator, three poultry farms where chicken broilers are reared, a compound feed mill, a complex for poultry meat processing, a rendering plant, and three contemporary multi-profile laboratories

The entire production cycle from growing grains and eggs incubation, feed production, rearing, slaughtering to final consumers sales are under strict quality control.

Vertical integration, as well as investments in modern production facilities, allows “Agro-Oven” to have control over the quality and price of its product, ensure competitive in both domestic and international markets.

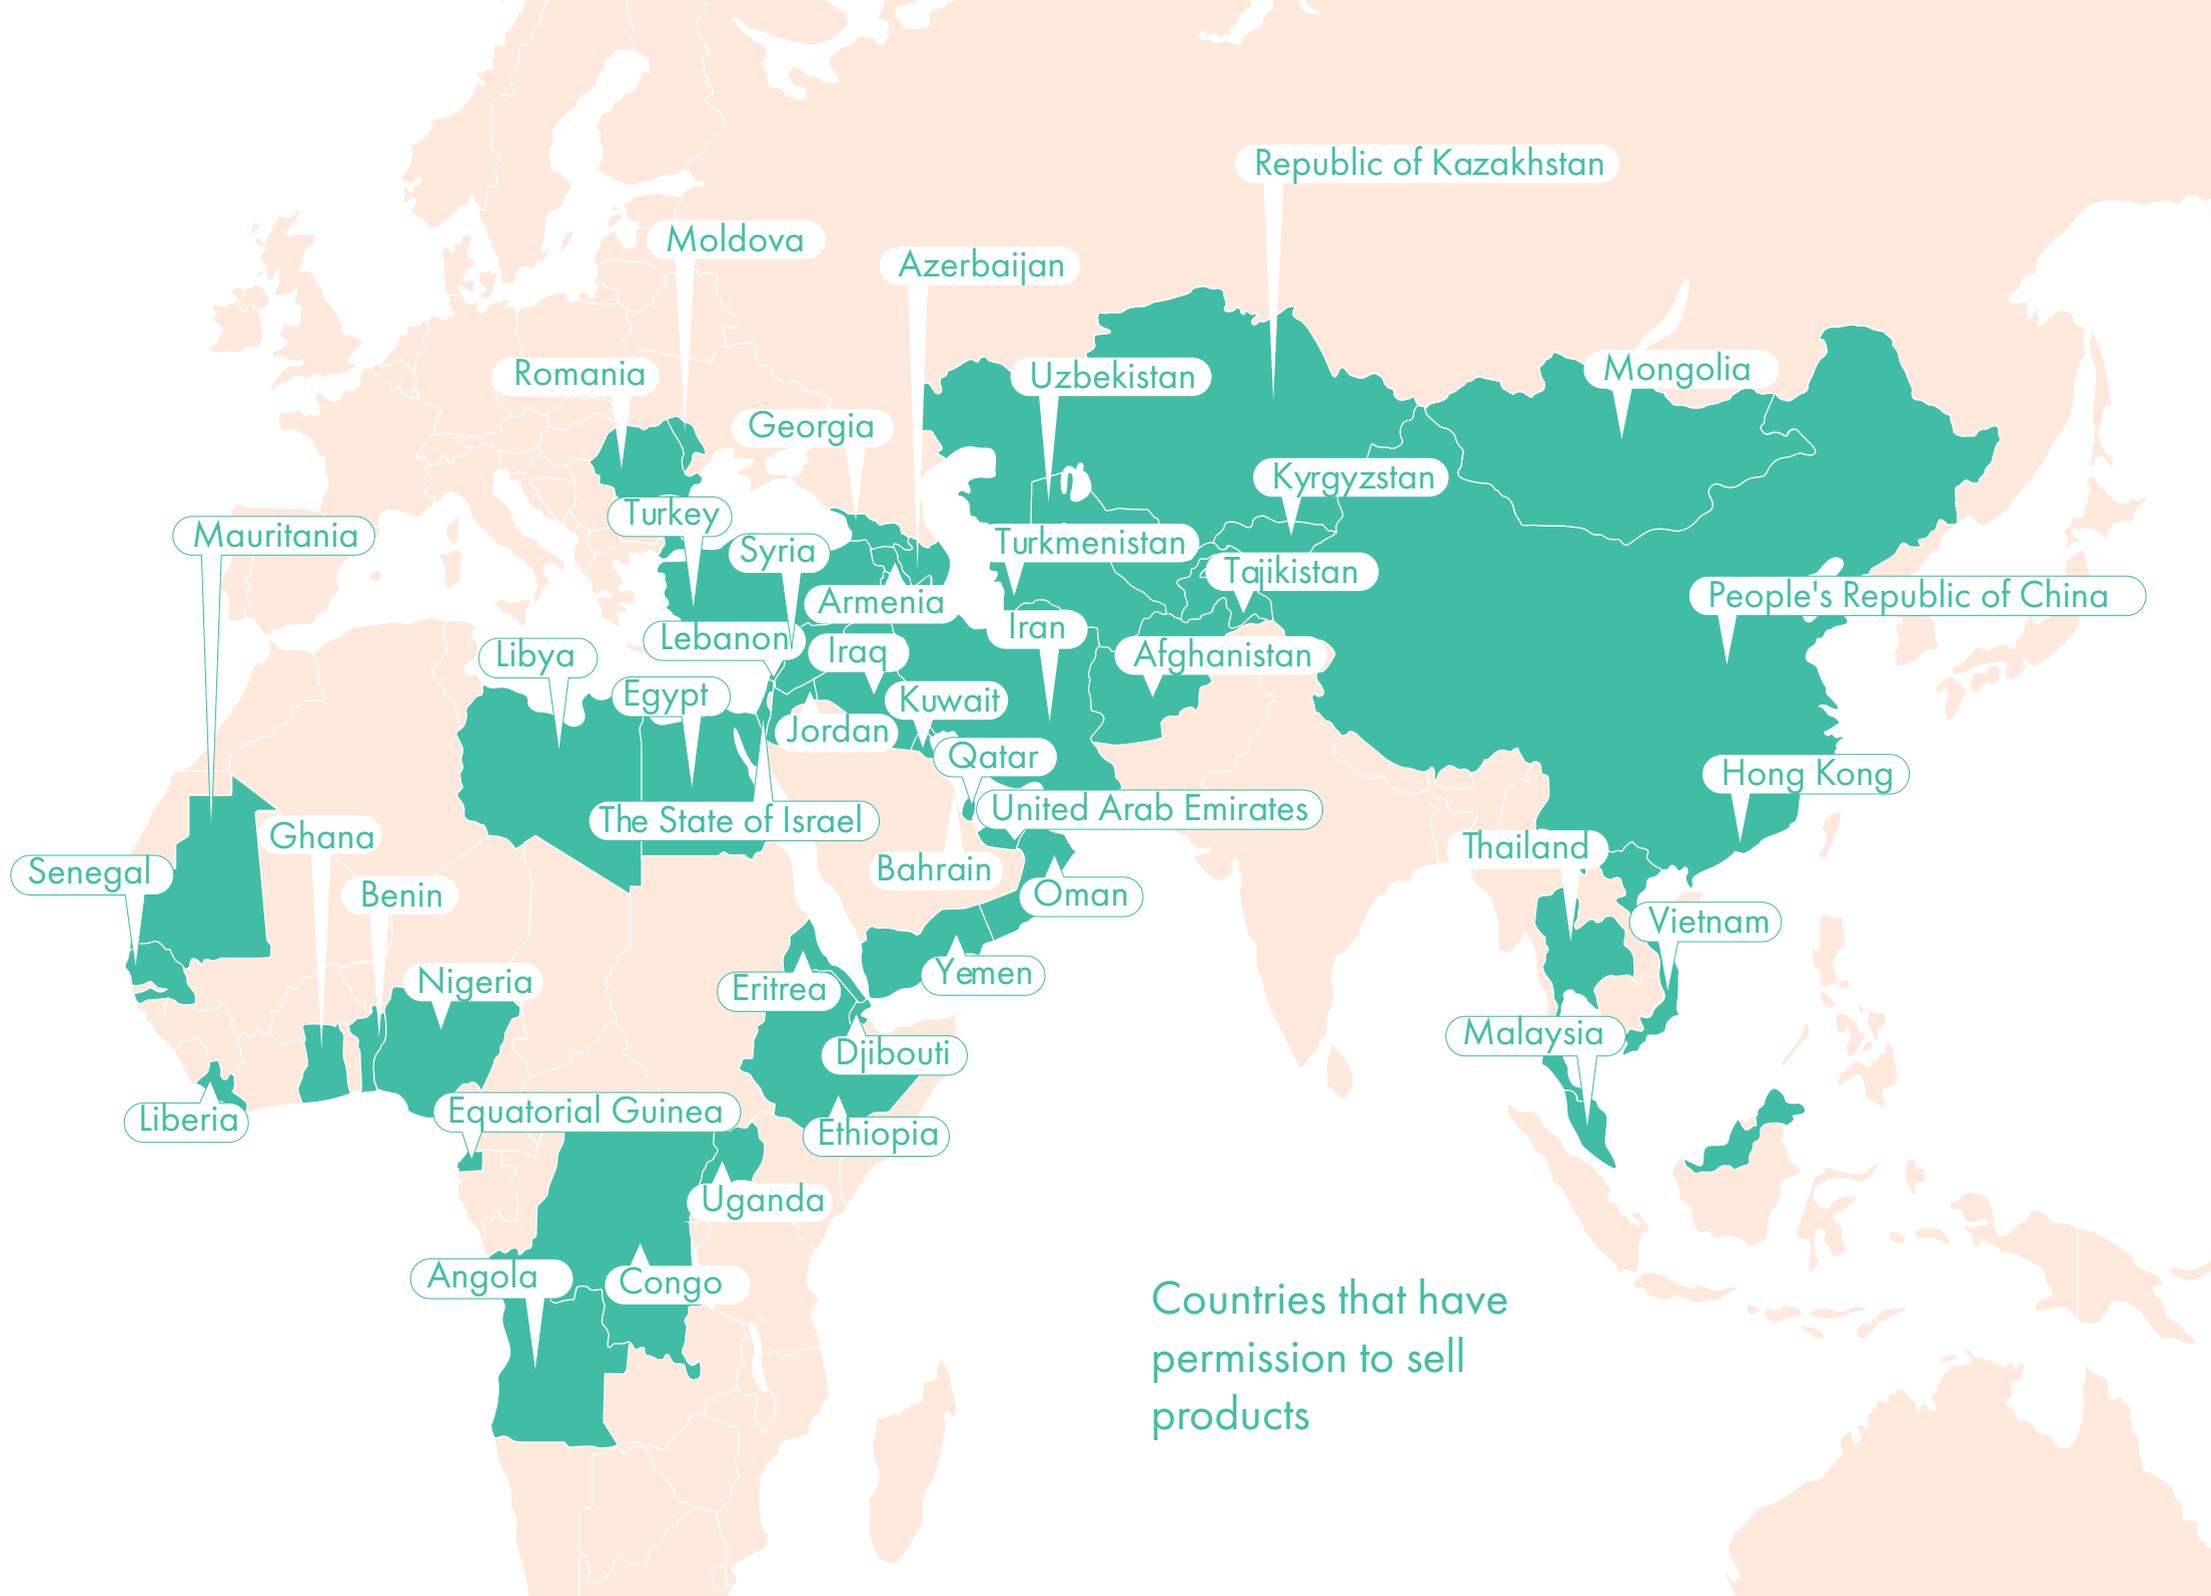

The main objective of the broiler business branch “Agro-Oven” is to provide to consumers natural high-quality products.

Highly-nutritious feeds manufactured at the “Gubnikha Compound Feed Mill”, elimination of harmful additives of artificial origin in birds’ diet, clean fresh water drawn from an artesian well, contemporary manufacturing technology, and due care of the “Agro-Oven” professionals guarantee high quality and excellent taste of meat.
